Melt Day one

Something in between
transition, transitioning
Liquid. A changed state

Boundaries of water
migrating, trading, changing
Through unclear borders.

Boundaries of water
inflated, marketed, sold
in mottled bottles

Melt, melting, melted
water freezing, frozen, ice
steam evaporates

社会の中で生きること、
個人がずっと居るに居ることは、自らも買収する。
買収とは売れることではないのだ。売りが買れ、買みが買れ、
それでもけつして居られない機会を通告として、
自然に受け入れられるようになることなのだ。

That probably comes from the tap and up holes
You could dig up the ground
At have a good look around
but you know theres a stop up the road?

自分の罪は悔いだが、だから、罰を受けるのも好きじゃないんだ、
なぜだか、そういう罰苦になっちゃってるけど、
不思議——いや、不思議でもないが、
だから被害者になったのかもしれない、
自分じゃない人物になるんだからね、借って罰苦は、

procedure

fall backs

when you get tired you can rely on the procedures (techniques)

like in an evacuation when people get panicked they just follow the steps. the procedure it has to be second nature. reliable. memorable.

it becomes about choices - quick choices and commitment. not best your work just work. they decide anyway.

first way to make it interesting for yourself.

but then there is a revolt. when it becomes dodgy but they can't tell you off because you're ticking the boxes, meeting the description.

fulfilling the quotes

仕事を辞めたときに、心に買ったことはこの3つです。
「自分よりも若い人と仕事をしよう。
今までやったことのないことをしよう。
真が合わない人とは仕事をしない」
——河野通和が「学ぶこと、読むこと、仕入れること。」の中で

I've had many of these jobs.

It's also about time.

The calculation of time vs effort or energy.

Manage your time well, over lap ideas.

It could go forever you need to just follow the procedure to get through. there are steps.

I guess it's about your own integrity.

If everyone else is going along just ticking boxes along just enough then you choose how you tick and with what qualities you tick the boxes with.

Always follow the steps

Always follow the steps

always follow the steps

10年間の経験から、改めて二人の言葉に感動を受けた。その言葉、言葉一つ、素晴らしい言葉だ。みんな読んでほしい。そして、自分の心の中に、その言葉が響くように。その言葉が、あなたの心の中に、響くように。その言葉が、あなたの心の中に、響くように。

It makes it seem less daunting,
less big. More manageable.

But you need to know the steps.

The procedure → a way to
form max^{efficient} output. Yes. figure
out the way you can produce
the most output. then just follow
it every time. Be efficient, economical.

because it's about longevity,
what do we get out of this?

who is this for?

why do I keep going?

I could almost go all day.
Because I just care about the procedure
following the procedure and trusting,
not knowing that that generates
output.

But then you have to be at these
 the things like technique - actual
 technique. A dancer would have
 techniques of how to do a jump
 a cleaner would know what
 to use to get at an oil spill. It's
 the same - but you have to know
 these techniques so well to keep
 going. You will have to know
 them without thinking about them
 because you will be managing your
 energy/effort over time.

This is ~~not~~ about quantity over quality.
